Data Scientist Course Schedule

Introduction to Data Analytics

COURSE TIMETABLE | MODE Weekend | 16.03.2026 - 12.04.2026

BLOCK	MODULE	DATE	WEEK DAY	DURATION	TYPE	SUBJECT
Blok 0	Prework	16.03.2026	Monday	17:00-18:00	Teacher-guided classes	Kick-off call
				30h	Self-study	Prework start
		23.03.2026	Monday	18:00-20:00	Teacher-guided classes	Prework summary and intro to Excel (non-mandatory)
Blok 1	Module 1	28.03.2026	Saturday	09:00-17:00	Teacher-guided classes	Data Science process - steps 1-3: Framing the problem and obtaining, cleaning and processing data
		29.03.2026	Sunday	09:00-17:00	Teacher-guided classes	Data Science process - steps 3-5 Exploration and in-depth data analysis
				8h	Self-study	Self-study/Homework
				2h	Self-study	Self-study
		11.04.2026	Saturday	09:00-17:00	Teacher-guided classes	Communicating results; A/B Tests
		12.04.2026	Sunday	09:00-17:00	Teacher-guided classes	Final project

Coders Lab
IT ACADEMY

COURSE SQL for Data Analysis

COURSE TIMETABLE | MODE Weekend | 13.04.2026 - 17.05.2026 |

BLOCK	MODULE	DATE	WEEK DAY	DURATION	TYPE	SUBJECT
Blok 0	Prework	13.04.2026	Monday	11h	Self-study	Prework start, final project and class preparation to be completed
		20.04.2026	Monday	18:00-20:00	Teacher-guided classes	Prework summary (non-mandatory)
Blok 1		25.04.2026	Saturday	09:00-17:00	Teacher-guided classes	SQL basics
		26.04.2026	Sunday	09:00-17:00	Teacher-guided classes	Relationships and JOIN
				2h	Self-study	Homework
				2h	Self-study	Preparation for classes
Blok 2	Data analysis, Procedural SQL	09.05.2026	Saturday	09:00-17:00	Teacher-guided classes	Data analysis
		10.05.2026	Sunday	09:00-17:00	Teacher-guided classes	Procedural Language for SQL
		16.05.2026	**Saturday**		**Individual work**	**Final Workshop - individual work**
		17.05.2026	**Sunday**	**18:00 deadline**	**Individual work**	**Final Workshop - individual work**

Coders Lab
IT ACADEMY

COURSE Data Analysis with Python

COURSE TIMETABLE | MODE Weekend | 18.05.2026 - 26.07.2026

BLOCK	MODULE	DATE	WEEK DAY	DURATION	TYPE	SUBJECT
Blok 0	Prework	18.05.2026	Monday	30h	Self-study	Prework start
		25.05.2026	Monday	18:00-20:00	Teacher-guided classes	Prework summary (non-mandatory)
Blok 1	Python	30.05.2026	Saturday	09:00-17:00	Teacher-guided classes	Python: functions, lists, tuples, strings
		31.05.2026	Sunday	09:00-17:00	Teacher-guided classes	Python: objects, files, exceptions, libraries
Blok 2	SQL, JSON and APIs			2h	Self-study	Homework
				2h	Self-study	Preparation materials: SQL, JSON and APIs
		13.06.2026	Saturday	09:00-17:00	Teacher-guided classes	Basic operations, PostgreSql, relationships, functions
		14.06.2026	Sunday	09:00-17:00	Teacher-guided classes	JSON AND API, authentication
Blok 3	Pandas			2h	Self-study	Homework
				2h	Self-study	Preparatory materials: Pandas
		27.06.2026	Saturday	09:00-17:00	Teacher-guided classes	Pandas
		28.06.2026	Sunday	09:00-17:00	Teacher-guided classes	Pandas cont.
Blok 4	Web scraping and data visualization			2h	Self-study	Homework
				2h	Self-study	Preparatory materials: web scraping and data visualization
		11.07.2026	Saturday	09:00-17:00	Teacher-guided classes	Plots
		12.07.2026	Sunday	09:00-17:00	Teacher-guided classes	Webscraping
Blok 5	PDF generation and final design			2h	Self-study	Homework
				2h	Self-study	Preparatory materials: PDF generation
		25.07.2026	Saturday	09:00-17:00	Teacher-guided classes	PDF creation, document creation by story, tables
		26.07.2026	Sunday	09:00-17:00	Teacher-guided classes	Project Workshop

Coders Lab
IT ACADEMY

COURSE Data visualization

COURSE TIMETABLE | MODE Weekend | 27.07.2026 - 06.09.2026 |

BLOCK	MODULE	DATE	WEEK DAY	DURATION	TYPE	SUBJECT
Blok 0	Prework	27.07.2026	Monday	10h	Self-study	Prework
		03.08.2026	Monday	18:00-20:00	Teacher-guided classes	Prework summary (non-mandatory)
Blok 1		08.08.2026	Saturday	09:00-17:00	Teacher-guided classes	Data visualization theory, color maps, Seaborn, Plotly, Dash, basics of visualization and in individual libraries, Plotly charts in Google Slides, Bokeh basics
		09.08.2026	Sunday	09:00-17:00	Teacher-guided classes	Projections, coordinates, cartograms, introduction to libraries, Geopandas, Geometry, GeoSeries, GeoDataFrame osm, Geojson, Shapefile, Mapbox
Blok 2	Dash, Graphs, Data Storytelling dashboard			2h	Self-study	Homework
				2h	Self-study	Preparation for classes
		22.08.2026	Saturday	09:00-17:00	Teacher-guided classes	Networkx and Grafy, what is a dashboard?, Networkx and Grafy, introduction to dash, Dash components, Dash datatable, Dash callback and app lifecycle, editable data table, interactions with dashboard, Dash Cytoscape
		23.08.2026	Sunday	09:00-17:00	Teacher-guided classes	Data storytelling, Dashboard, Tooltip, Multipage app, Bootstrap styles, Dash and SQL, Dash and maps
Blok 3	Tableau, final project			2h	Self-study	Homework
				2h	Self-study	Preparation for classes
		05.9.2025	Saturday	09:00-17:00	Teacher-guided classes	What is Tableau?, preparation of the work environment, first project, creating a dashboard, usage scenarios, Tableau and Mapbox integration, Tableau integration with Python
		06.9.2026	Sunday	09:00-17:00	Teacher-guided classes	Working on the final project

Coders Lab IT ACADEMY

COURSE Machine learning

COURSE TIMETABLE | MODE Weekend | 07.09.2026 - 18.10.2026

BLOCK	MODULE	DATE	WEEK DAY	DURATION	TYPE	SUBJECT
Blok 0	Prework	07.09.2026	Monday	10h	Self-study	Prework
		14.09.2026	Monday	18:00-20:00	Teacher-guided classes	Prework summary
Blok 1	Regression Classification	19.09.2026	Saturday	09:00-17:00	Teacher-guided classes	Linear Regression, Regularization in Linear Regression, Polynomial Regression, Regression with Decision Trees, How to Assess Regression Model Quality?, Metrics for Regression Models
		20.09.2026	Sunday	09:00-17:00	Teacher-guided classes	K-Nearest Neighbors, Logistic Regression, Classification with Decision Trees, Support Vector Machine (SVM), How to Evaluate Classification Model Quality?, Metrics for Classification Models
Blok 2	Fundamentals of Neural Networks and NLP Advanced Machine Learning Models; NLP - Natural Language Processing		Saturday	2h	Self-study	Homework
			Sunday	2h	Self-study	Preparation for classes
		03.10.2026	Saturday	09:00-17:00	Teacher-guided classes	Fundamentals of Neural Networks, Basics of NLP; Random Forests, Boosting, and Bagging, Neural Networks
		04.10.2026	Sunday	09:00-17:00	Teacher-guided classes	Working with Text Data, Bag of Words, TF-IDF, Word2Vec, BERT
Blok 3	Unsupervised Learning, final project		Saturday	2h	Self-study	Homework
			Sunday	2h	Self-study	Preparation for classes
		17.10.2026	Saturday	09:00-17:00	Teacher-guided classes	Unsupervised Learning, Dimensionality Reduction, Clustering, Anomaly Detection
		18.10.2026	Sunday	09:00-17:00	Teacher-guided classes	**Final exam & Working on the final project**

- **Teacher-guided classes -** mandatory on-line class with the lecturer
- **Self-study -** individual study at a preferred time with a support from your mentor on Slack
- **Prework summary** - teacher guided lessons that are non-mandatory but recommended
